

Since 2004 **VITECO** is the provider of eLearning platforms which are easy and intuitive, perfect for distance-learning. It uses on a daily basis Skype and other online collaboration tools that allow the company to operate easily throughout Europe, from Iceland to Turkey from Lithuania to Portugal. In 2018 its research and development team designed and implemented the innovative Facial Recognition System for its eLearning platforms. It supports training institutions and companies not only with the informatic infrastructure's implementation, but also through the design and production of SCORM-based courses and serious games.

**VITECO** is an ISO 9001:2008 and ISO/IEC 27001:2014 certified company for software's design, development and assistance and for training courses and eLearning methodologies' design, development and erogation.

**e-Logos®** is the eLearning platform for distance learning which, thanks to its fully integrated e-commerce, allows you to sell and deliver easily online courses. **e-Logos** is the ideal eLearning platform for all those training providers who want to take advantage of distance learning and want more freedom in customising web pages in comparison with open sources' strict rules.

**Features:**

- ✓ building-up of your own training course;
- ✓ definition of rules to attend the course and complete it;
- ✓ possibility to upload SCORM files;
- ✓ possibility to implement Facial Recognition System;
- ✓ certificate download at the course completion;
- ✓ learners monitoring;
- ✓ integrated e-commerce;
- ✓ easy payment system;
- ✓ possibility to integrate with WordPress.
